### University Open Ended Items

**Open 1** What aspects of this course helped you learn?

The organization of this course was really what made this an awesome experience. Canvas is so organized and Professor Connell is so consistent. Having essentially all assignments due the same day is great. The lecture readings/videos were great because we were given most of the content and discussed during class.

I loved the flipped format and the discussions. She is really passionate about her teaching and it helps how she wants us to know stuff without testing. I honestly love the projects.

This course taught me a lot and was very interesting. Was a very nice break from the math and science world of engineering prerequisites. I really liked the format of the class and appreciated Friday zoom breaks

Using the variants of both reading materials and lecture videos.

The discussions board posts are great assignments. I attend class every day. I always ask questions and participate.

The homework, discussion board posts, the lectures (live and pre-recorded), and the professors' passion for the content and the engagement in class. She also went over new content very well, while making comparisons that were easy for us to connect and she made sure we understood the content.

the teaching style was great. Wish I had taken it in-person.

Watching lectures and going to class were very beneficial for understanding material. Course was well made. No Friday lecture was nice.

The instructor was very thorough and made the course fun.

I really enjoyed not having exams and having quiz/written assessments.

**Open 2** What changes to this course could improve your learning?

Nothing. It was set up perfectly.

Not much. I really liked it and learned a lot.

Honestly cannot think of improvements. If this is ever over zoom again maybe try to incentivize Turing on the cameras for bonus (if that's allowed)

Be in person!

N/A.

The class was very well structured!! This professor did a GREAT job this semester. She was always making class enjoyable and educational! I appreciate the time and effort she put into zoom classes!!

I think the projects towards the final week are a little heavy. Would love more open discussions about random things like different show languages. She is truly amazing.

No reasonable changes could be made to improve this course.

I don't think there is anything that I could think to change to improve my learning!
